LA CRYPTOPARTY:

More Info:

Step 1) By bike or public transport, go far away from your house to another city. Don't bring your phone or computer or debit/credit cards. Take lots of cash.

or Work WiFi or anywhere associated with your real identity/ where you may be recognized.

Step 2) At a Best Buy or other similar store, purchase a burner phone + (non Smart-phone) prepaid SIM Card

Please Note these are
just the general steps,
further research is
required to ensure full
anonymity.

Please Note that these are
the general details of the
further research required
to ensure full implementation
of the proposed system.

o. Work with others
anywhere associated
with your real identity
where you may be
organized.

Step 1) By bike or public transport, go far away from your house to another city. Don't buy your phone or computer or debit / credit cards. Take lots of cash.

Step 2) At a Best Buy or other similar store, purchase a burner phone + (an smart-phone) prepaid SIM card

Hooray.

Now you have anonymous Log-ins, two cell phones unconnected to your real identity, and an anonymous laptop running TAILS, plus your own stash of anonymous bitcoins for use when you need them.

Just remember to never use these over your home

Take a copy of TAILS
Log-ins.

Step 3) Before we
can do this, we need some fake/Human
Log-ins, we need to set up
some fake/Human Log-ins.

Now you have anonymous Log-ins, two cell phones
and a dumb-phone, and
the BLU TANK II for
the SIM card.

NOTE: We recommend the BLU TANK II for dumb-phone, and Ready SIM for SIM card.

Step 3) Before we continue, we need to set up some fake/throwaway Log-ins.

Take a copy of TAILS and your setup burner phone to the Library.

Step 4) Using your burner
for cell-phone authentication,
create a list of fake
log-ins & passwords to use
later.

E.G.

- gmail accounts
- mail.com account
- amazon.com
- icloud account / android app store
- social media
- whatever else you might want
Note: sites like smsreceivefree.com
can be used to create disposable
phone #'s for log-ins.

- transfer bitcoins from
bitaddress.org to offline
paper wallet for safe
storage
- create an offline bitcoin
paper wallet using
bitaddress.org
- buy bitcoins over western union
using burner phone number
- set up account w/ localbitcoins.net
- Go to localbitcoins.net
and buy bitcoins

Step 4) Using your burner
for cell-phone authentication,
create a list of fake
log-ins & passwords to use
later.

Step 9) Buy bitcoins
Anonymously

- Go to localbitcoins.net
- set up account w/ all
fake info
- buy bitcoins from someone
over western union
- create an offline bitcoin
paper wallet using
bitaddress.org
- transfer bitcoins to offline
paper wallet for safe
storage.

- whatever else you might want
Note: sites like smsreceivefree.com
can be used to create disposable
phone #'s for log-ins.
- social media
- icloud account / android app store
- amazon.com
- gmail accounts

E.G.

Step 4) Using your burner
for cell-phone authentication,
create a list of fake
log-ins & passwords to use

- Only use your phone + comp over VPNs, ideally on TOR browser
- Use Signal messenger app on phone for texts + calls
- Encrypt email whenever possible
- Do your own research!

Step 5) Now go back to the store, buy an android smart phone, Wi-Fi USB dongle, more pre-paid cards, and a cheap laptop In Cash ideally from separate stores, in different cities, over multiple days.

Note Lenovo T-series

thinkpad is good, has easily removable hard-drive,

an np - card hard - disk
easily removable hard - disk
say, good, is pad thinkpad
Lenovo T-series **Note**
Shop split over multiple days.
be purchased in different
cities, ideally from
a cheap laptop
and a cheap USB
dongle, more pre-paid cards,
smart phone, Wi-Fi USB
over VPNs, ideally on TOR browser
two + avoid your phone +
use Signal messenger app on
your own personal
Encrypt email whenever possible

Step 6) Remove the hard drive from your computer, run with TAILS only via USB

set up TAILS persistent volume
to store pre-made Log-ins + Passwords
(see other TAILS propaganda)

Step 7) Set up your smart phone using pre-made Log-ins.

NOTE
Never provide real info, never log in to account associated with your real self

using TAILS via USB
