RESEARCH

2024 ANON SERIES

BOOK 4
LA CRYPTOPARTY

Anonymous Research is the foundation of anonymity. It is the act of reading, listening, or consuming information without anyone else knowing you are doing so.

1) READING
PHYSICAL TEXT

Obtain a book, newspaper, or
magazine and read it
without anyone seeing or
identifying you. Don't check
something out from the
library, just read it there.

ALWAYS limit being
identified — mask up.

Obfuscation is key.

2) NOT YOUR COMPUTER

USE A LIBRARY computer of public computer to surf the web and read content. DON'T LOGIN with a LIBRARY CARD OR OTHER IDentification.

3) DEDICATED DEVICE

- BUY A BURNER Phone or tablet anonymously w/ CASH. TURN OFF the cellular data and only use wifi. DON'T put any personal identifyyg information into the device.

- Goto a location with free wifi that you don't normally go.
  - Library, coffee shop, city wifi, fast food joint

- Use the wifi w/ your anonymous device and do research online.

NOTE*

TURN off your.
normal phone &
other tracking
devices before
visiting public
wifi locations

4) ADD A VPN

- BUY A VPN
  ANONYMOUSLY
  W/ A ~~CASH~~ VISA
  GIFT CARD
  Bought W/ CASH.
  A VPN WILL
  ~~obsura~~
  ~~obsur~~
  obscure your location
  further.

(we like MULLVAD VPN in 2024)

5) ADD TOR

TOR stands for

THE ONION ROUTER

AND it is the
most anonymous research
tool you can use to
obscure your identity
online.

You can download TOR from https://torproject.org and install it on your dedicated anon device or on your normal comp, tablet, or phone. TOR greatly obscures your location more than a VPN.

DON'T FORGET!!!

Researching is only anon if you aren't providing identifying information. Logging into a service w/ your real email or phone# will destroy anonymity. Instead use an anon email address or a temporary email address from 10 minute mail or alternative service.
